

The radio station K-LOVE serves me in my local community by provding valuable local-global information as well as great music to listen to in traffic. The effect on the local community if K-LOVE were to be displaced by an LPFM braodcaster providing other programming than the wholesome, family-oriented programming from K-LOVE would be that there would be yet another radio station that is offensive, valueless in quality, and not good for people of all ages to listen to. I believe because K-LOVE can be listened to (and understood) by young and older people that the service they provide is in the public interest. Thank you.
